I'm a Flutter Developer with a passion for the open-source community. I have experience in deploying applications and have helped startups grow and launched first version of their product. I just graduated from college, but still am very passionate about programming. I deployed 7 apps on app stores and also maintained that application. Please view my portfolio by the link beside to know more about me.

WORK EXPERIENCE

C++ Developer Intern
Edisphere Software Pvt Ltd

06/2019 - 01/2020   *Nagpur,India*

PROJECTS

My Medical ID (11/2021 - 02/2022) 🔗

- *My Medical Id* is life saving digital world of documentation. Where, you can store all your medical record and health reports in this portal securely.

PrintIn 🔗

- Printin focuses on easing the way of taking printouts. This act as a platform between the user who wants to print a document and a print store's shopkeeper.
- Through this application, the user can either pre-order the document and collect it later or can get the printed document at their location.
- This App also focus on making the printing process further easier by having the option to scan available in the application.

MMID - Doctor (02/2022 - 04/2022) 🔗

- My Medical ID -Doctor's Panel is an excellent feature. This feature allows Doctors to view his scheduled appointments, patient history and consultation records.

Shops Digital Ads (09/2022 - 01/2023) 🔗

- The Shops Digital Ads is a digital advertising platform that allows you to display ads in public. With this platform, user can improve the connection between their brand and the people who are most likely to buy from them.
- User can publish the advertisements using the application to the displays that will be installed at different locations.
